

# Delicious Living

## THANK YOU FOR NOT SMOKING

### VENTILATION

#### PERFORMANCE

Eliminates unwanted grease, smoke and odors instantly, for a more enjoyable cooking experience. Professional and at-home chefs appreciate the 1200 CFM on the Island Hoods and 600 CFM on all other DCS hoods and downdrafts.

#### GOODBYE, UNWANTED ODORS

True chefs are adventurous in their use of exotic spices & ingredients. The DCS Island Vent Hoods and VS series use stainless steel baffle filters, and the ES series hoods and Downdraft use stainless steel mesh filters to eliminate unwanted smoke and odor.

#### VERSATILITY

DCS offers a menu of hood options: Island Vent Hoods, Wall Hoods, Downdrafts. With a variety of sizes and optional duct covers DCS can accommodate the ventilation needs of almost any kitchen.

#### POWERFUL LIGHTING

Two-level halogen lighting powerfully illuminates your working space. Wall hoods are pre-wired to accept optional infrared warming lights.

#### EASY TO CLEAN

The heavy duty stainless steel mesh and baffles are dishwasher safe, eliminating a traditionally tough job from your regular routine.
