FEATURES & BENEFITS

Stainless Steel Burners
The precision ported U-shaped stainless steel burners are rated at a massive 25,000BTU each, offering premium quality and performance. A heat shield directs heat upwards maximizing heating efficiency.

Ceramic Radiant Technology
A layer of ceramic rods provides intense yet even heat. It gives a consistent grilling surface, with controlled heat rather than direct fire.

Direct Burner Ignition
An ergonomic ignition solution, where burners are lit directly from the corresponding knobs.

Smart Beam™ Grill Light
A halogen light is designed to illuminate the entire cooking surface for perfect night grilling.

Temperature Gauge - Zero To Sear
Go from zero to sear with DCS Grills' new built-in temperature gauge. It lets you know exactly how hot the grill is, even when the hood is down.

Rotisserie Made Easy
Inspired by our commercial heritage, DCS Rotisserie Grills are the perfect package of robust construction, powerful motor, consistent temperatures and strong forks. DCS Rotisserie Grill models feature a dedicated infrared rotisserie burner, providing controlled searing up to 14,000 BTU per hour. The heavy-duty motor allows you to load your Thanksgiving turkey (and more!), while the Smart Beam™ Grill Light illuminates the entire cooking surface for perfect night grilling. Load up your new DCS Grill's rotisserie then sit back and let the grill do the work.
